

**Session Program**

**17-22 Aug 2026**

**12th Workshop on Flavor Symmetries and  
Consequences in Accelerators and  
Cosmology (FLASY 2026)**

***BSM 1***

Commodore Hotel  
Gyeongju

Wednesday 19 August

11:00

13:00

| BSM 1       |                                                                                     |
|-------------|-------------------------------------------------------------------------------------|
| Session     | Location: Commodore Hotel, Gyeongju                                                 |
| 11:00–11:30 | Exploring Light Sectors from Multi-brane Warped Geometries                          |
| Speaker     | Dr Doojin Kim                                                                       |
| 11:30–12:00 | Cepheids as a dark matter detector                                                  |
| Speaker     | Prof. Hyung Do Kim                                                                  |
| 12:00–12:30 | Probing Higgs self-coupling using Higgs-pair production at multi-TeV Muon Colliders |
| Speaker     | Kingman Cheung                                                                      |
| 12:30–13:00 | Collider Spin Tomography with Missing Neutrinos                                     |
| Speaker     | Jia Liu                                                                             |
