

Status of CMB observations: Planck and beyond

Monday, 12 October 2015 11:05 (45 minutes)

I will review the current status of CMB observations focusing on the ESA Planck mission. I will also review the status of B modes searches, reviewing the current limits and the many experiments coming online or in the planning stage that promise either to make a first discovery or to substantially tighten current upper bounds.

Presenter: Dr BUCHER, Martin (APC/U. of Paris)

Session Classification: Plenary Session
