

Unification and "invisible" axion

Monday, 27 August 2018 11:00 (30 minutes)

I discuss the invisible axion arising from GUTs and string compactification. It will also include our recent calculation of the current misalignment angle, which leads to about $10^{-18}\bar{\theta}_1$ where $\bar{\theta}_1$ is the initial misalignment angle at the time $m_a = 3H$.

Presenter: Dr KIM, Jihn E. (Kyung Hee U.)

Session Classification: Plenary Session
