

# The 3rd Annual Autumn AIM Workshop on Immune Homeostasis

## Sunday, 15 November 2015

### SESSION I: Innate – adoptive immunity - 182 (09:00 - 12:00)

-Conveners: Sin-Hyeog Im

time	[id] title	presenter
09:00	Welcome&Overview; of AIM	
09:10	[1] Commensal-induced inflammatory cytokines control steady state expansion of hematopoietic multipotent progenitors	LEE, Seung-Woo
09:35	[2] Carbon Monoxide Regulates Metabolic Homeostasis via Innate Immune Response	CHUNG, Hun Taeg
10:00	BREAK	
10:20	[3] Ets1 regulates T cell activation through alternative splicing	KIM, Gi-Cheon
10:40	[4] Genome-wide analyses of transcription factor Ets1-mediated gene regulation in CD4+ T Cells	LEE, Choong-Gu
11:05	[5] Control of Systemic and Organ-specific Inflammation by Foxp3-associated Transcription Factors	RUDRA, Dipayan
11:30	[6] Immunological memory in NK cells	SUN, Joseph
